

Stageline Rigging Plan Verification

October 19, 2016

To Whom It May Concern,

A complete rigging plan verification has been performed for the following Stageline stage and event:

Stage Model: Stageline SL320
VIN #: #252 2N9SL32074A045252
Project Name: Laid Back fest
Location: Lakewood, GA
Project reference #: 98686-17
Event date: October 28, 2016
Expiry Date: October 30, 2016

The submitted plot found below has been submitted by Todd Landsiedel and has been reviewed by Marie-Josee Benoit from Stageline. All rigging weights, along with their placement in the roof, conform to the rigging capacities on the stage model outlined above. Please see the following page for any specific restrictions or specific procedures, if applicable. In the event of a rigging change, an updated plot must be submitted for approval to an MSR/Stageline representative before said change can be made. If MSR/Stageline is not notified of the change, this verification letter becomes null and void. This verification is good for the duration of this event, provided that no rigging changes are made to the submitted and approved plot. This letter may not be used for another event or another Stageline unit.

If you have any questions, please feel free to contact us at any time.

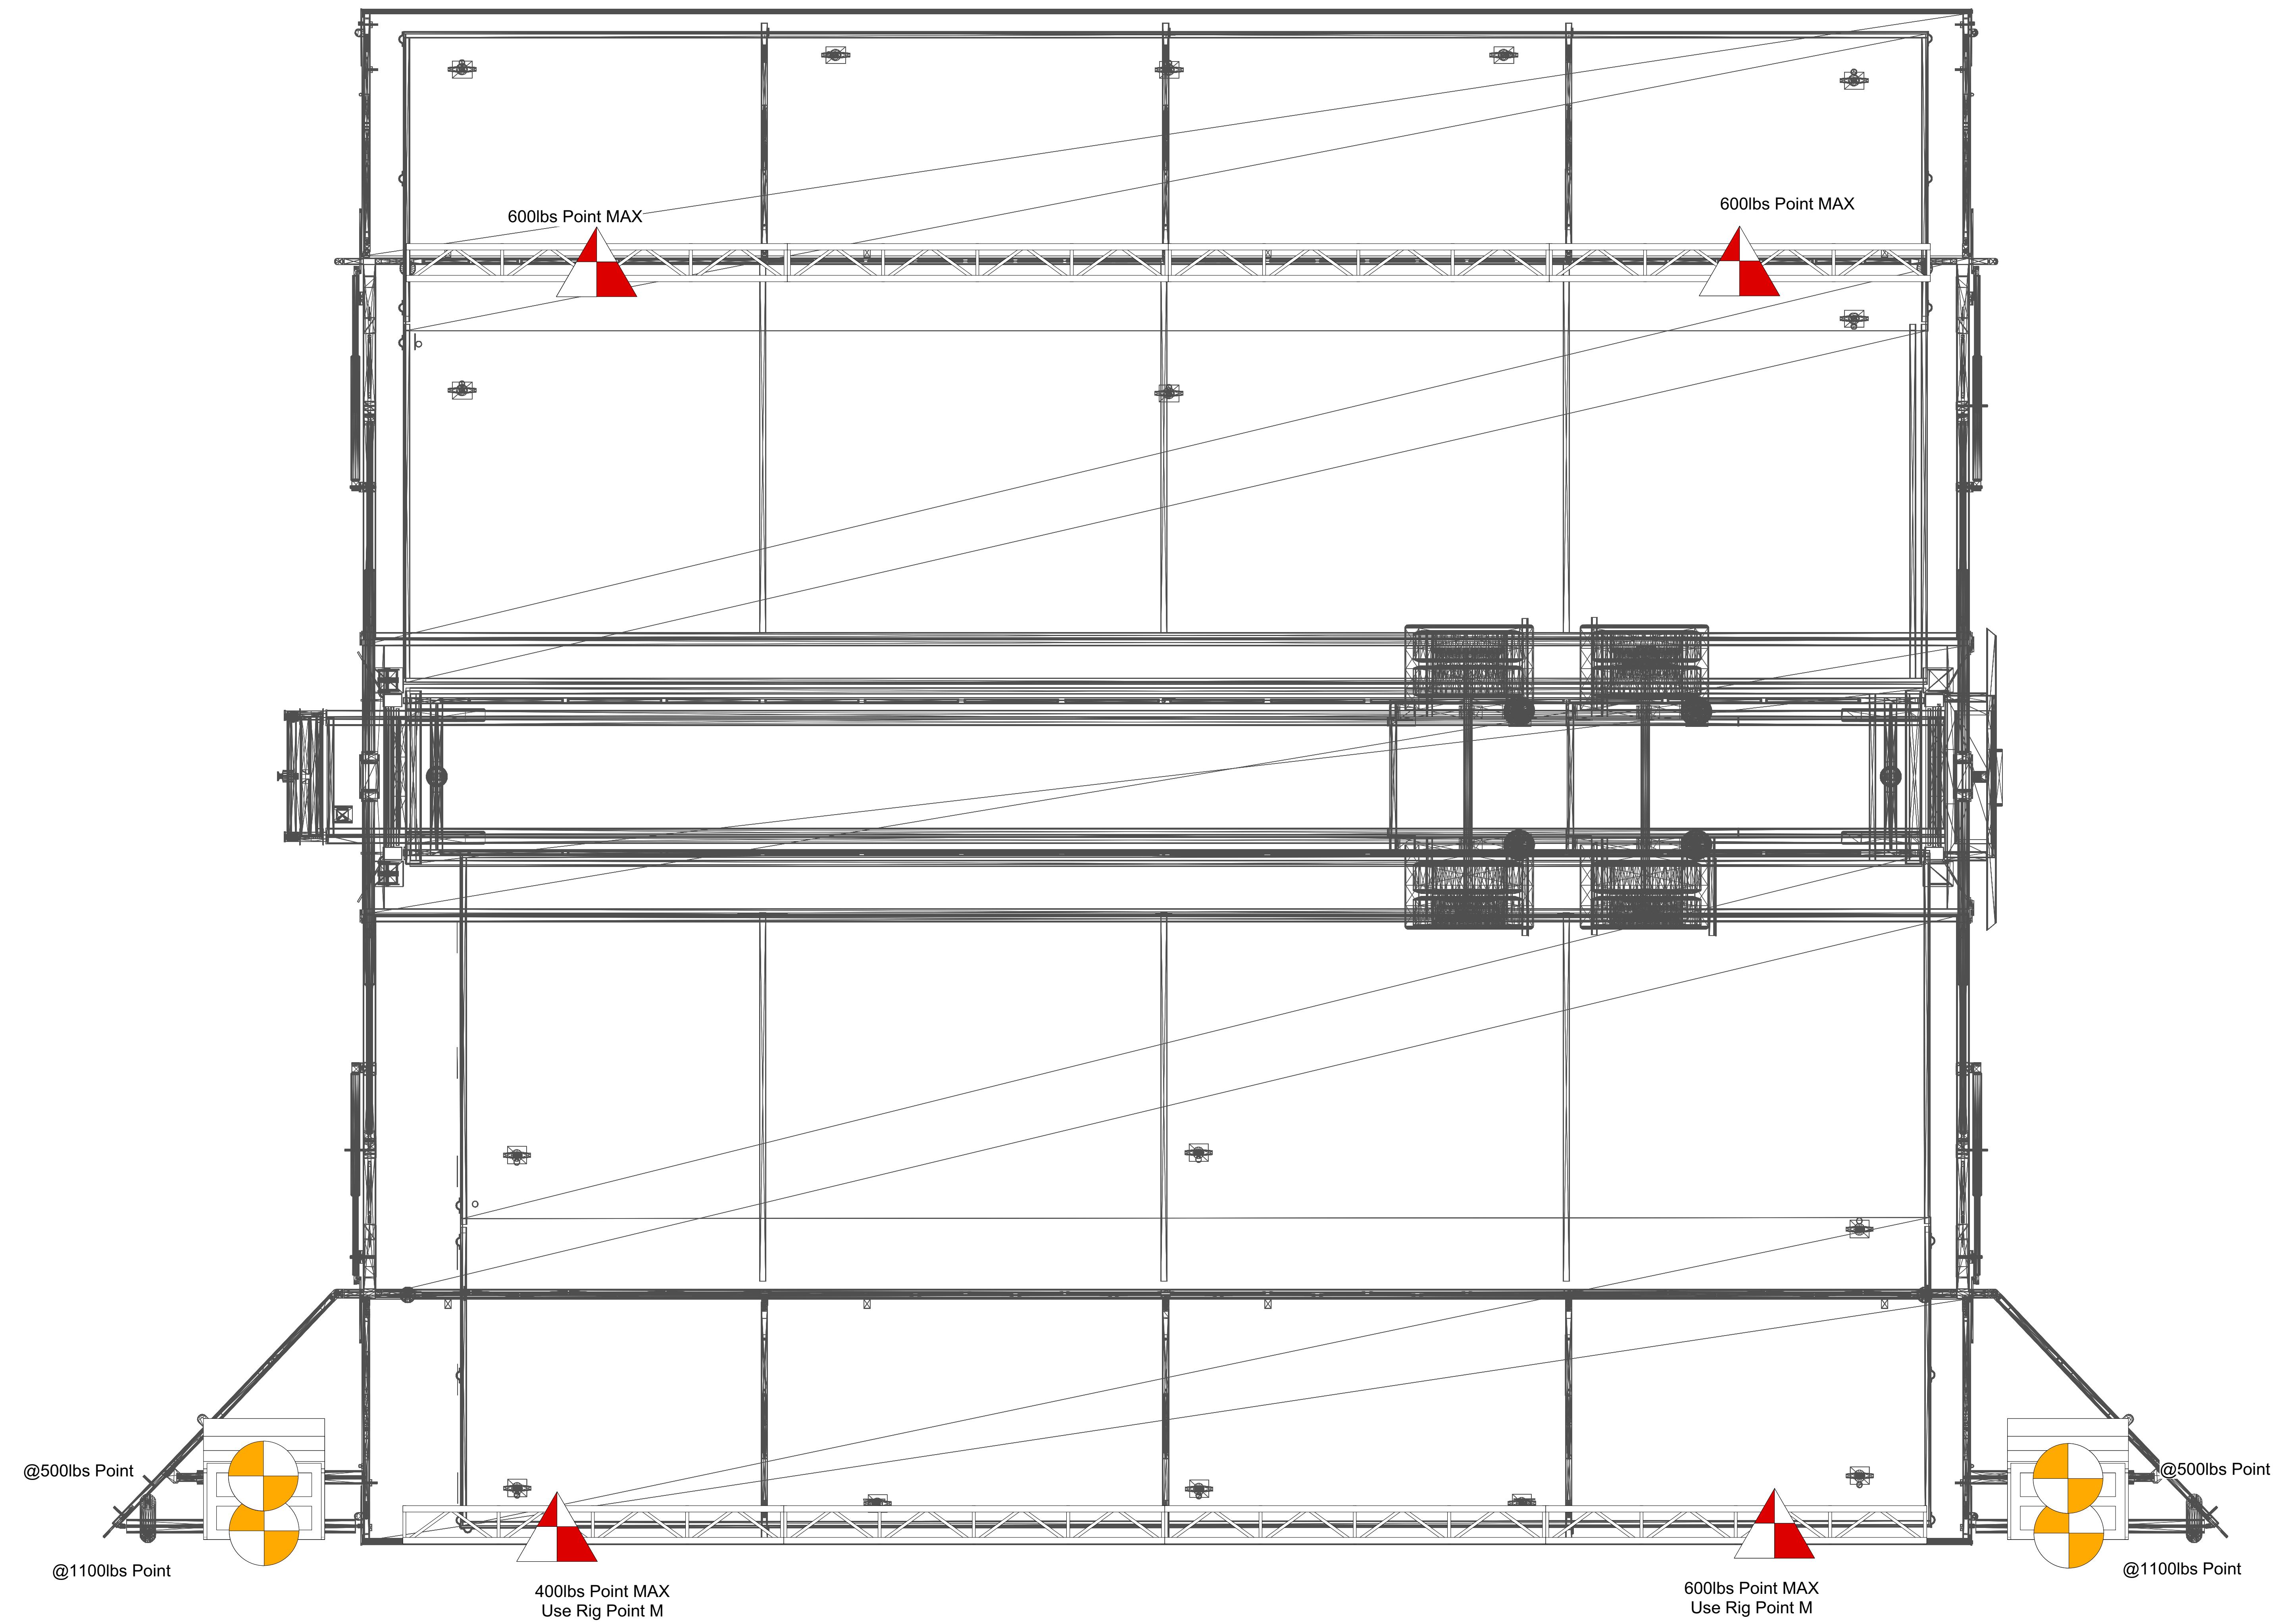

Thank you,

A handwritten signature in blue ink, appearing to read "Marie-Josee Benoit".

Subject: RE: 320 rig plot

Todd,

Can you please confirm which point you'll be using upstage on T2 ? It's all good if it's either P6s or P7s.

Please confirm

Everything else is allright

Thanks
MJ
